How it Works

The Bay Area Multifamily Capital Advance Program (BAMCAP) provides loan capital at 0% interest to your lender of choice, which means you only pay interest on the loan capital supplied by the lender. For example, if the lender approves their portion of the energy efficiency loan at 7% interest rate, BAMCAP provides half of the capital at 0%, the combined interest rate on the loan would be 3.5%. The program's share of the financing is limited to no more than 50% of the cost of the approved scope of work minus any program incentives. In addition, the share of the financing is up to \$5,000 per unit or \$500,000 per project, whichever is less.

How to Get Started

1. Once the analysis and scope of work has been program approved bring the *Pre-Approval of Eligible Energy Efficiency Measures* form visit our list of [participating lenders](#).
2. The lender will submit a project application to the program.
3. If approved, the Lender will close on the loan with you, the building owner.
4. You make monthly loan repayments to the Lender while enjoying below market interest rates.

Eligibility

The owner of any multifamily building consisting of five (5) or more attached units located in the nine county Bay Area (Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, Sonoma) are eligible to participate in BAMCAP. To access financing, buildings are required to receive a program-approved analysis of their building systems. This analysis can be conducted through the program's customized project consultation.
